TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

1003 f. Weeds Noxious weeds? _____

Comment Based on historic aerial imagery and field observations, it does not appear interim reclamation was ever performed. Areas not needed for production operations consist of annual, weedy vegetation with minimal perennial vegetation that is not reflective of reference area conditions.

Due to the location being within Greater Sage Grouse General Habitat Management Area, Operator shall consult with the Colorado Parks and Wildlife on a CPW-recommended seed mixture for reclamation with the Surface Owner's approval.

Corrective Action Perform reclamation in accordance to Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a CPW-recommended seed mixture with the surface owner's approval. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards, including stormwater and weed management.

Provide the CPW consultation regarding a CPW-recommended seed mixture and the surface owner's approval within the Operator's Field Inspection Report Resolution form per Rule 210.b.

Date 06/03/2024
