Corrective Action: Comply with Rule 903.d.(2)
Immediately cease venting.
Submit form 4 to report gas venting.

Date: 06/13/2024

Response: CA COMPLETED

Date of Completion: 06/10/2024

When notified that the drip was venting to atmosphere it was closed immediately. It was determined it had been knocked open by wildlife. The valve was closed and plug installed to prevent this from happening in the future.

Operator Comment: Due to the fact this is a low pressure line and only 1 well on that lateral I estimate the volume to be 24 mcf. The volume lose did not show up on any SCADA readings. See attached Gas Analysis
