Hi Tommy,
I agree with this plan as well for the well specified in the last email.

Hi Lexi,

I just realized that I forgot one well in July. The NEW CACHE 8-24 is located in Sec 6, T8N, R63W, and is within Bald Eagle Active Nest Site 1/2 mile buffer. We suggest the same BMP that work will be scheduled to occur outside of the timing stipulation for BAEA Nesting (Dec 1-Jul 31), or after the nest has fledged, confirmed by a qualified biologist. Just wanted to get this in front of you for transparency.

Thanks,

Tommy Coufal

Hi Tommy,

Thank you for the notice of your planned P&As. After our review, CPW agrees with your listed BMPs as long as they are within the agreed-upon pre-Form 6 CPW consultation HPH areas.

Please let me know if any questions arise. Have a great rest of your day.

Good morning Lexi,

The following wells have been added to Chevron's P&A schedule for July and August 2024. They are located within agreed upon Pre-Form 6 CPW Consultation HPH. Please see the table below for our suggested BMPs for these wells. For the wells that are located within the BAEA Nesting buffers and scheduled for July, that is provided we get an environmental survey stating that the nest has fledged early or is unoccupied. If the nest is still active-occupied, we will push the jobs out until the nest has fledged. Please let me know if you have any questions or concerns.

Proposed Schedule Date	Well Name	API Number	Status	Township (SP)	Range (SF)	Section SF	Project type	CPW Consult Required	HPH Type	Suggested BMPs
