Date: MAR 19 1984

The Jurisdictional Agency determination was based on information contained in or added to the Application. Review by the professional staff of the Colorado Commission indicates that this well is an (~~New~~) (Old) well. The well produces from the "J" Sand reservoir(s); at a rate not exceeding

60 Mcf/day of non-associated gas when produced at a maximum efficient rate for a 91 calendar-day period ending June 30, 1983

This well produced at a daily average of less than 60 Mcf/day for the 12 month period ending consecutively with the "90-day period"; thus satisfying the rebuttable presumption in Order No. 44 and establishing the MER.

This conclusion was originated by examination of a production summary, completion report, and statements in the application which show this well produced for 91 days and did not produce for 0 days during the applicable "90 day" period. The daily average production was 4.49 Mcf and 0.49 Bbls. crude oil computed on 91 days.

Which show this well produced a total at the well head of not more than 60 Mcf per day for a "90 day" period which occurred within 180 days prior to the date of filing.

Therefore meets the qualifications of a ( 108 ) well as defined in the N.G.P.A.
