Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR COMMENT

This is a resubmission of Form 403782695 that includes the analytical attachments.

From from 403782695:

Summit Midstream plans to drill this site for delineation purposes in Summer 2024. Summit plans to advance five (northeast, southeast, southwest, northwest, and center) borings in and around the excavation area.

A depth to water discussion is included as an attachment to this form. Based on information provided, Summit asserts that there is no clear path to groundwater on this Site and the Residential Soil Screening Levels should be used.

Lateral delineation borings will be sampled at the approximate depths of impacts previously observed. The vertical delineation boring will be sampled at the approximate depths of impacts and below.

Based on previous results, summit requests the reduced analyte suite of EC, SAR, pH, and Arsenic. Please see the attached map for the approximate boring locations. The exact location of these borings may have to be adjusted in the field due to local conditions.

In addition, Summit plans to advance an additional boring in a native non-disturbed area and collect additional background sample(s). Summit requests approval of the delineation and background sampling plan above.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
