CORRECTIVE ACTIONS:

1 CA# 197257

Corrective Action: Comply with Rule 1002.f- install or repair/maintain BMPs. Date: 08/15/2024

Response: CA COMPLETED Date of Completion: 08/13/2024

New wattle fence has been installed and updated as needed. Wattle fence has been installed to reinforce existing straw wattles. The use of wattle fence was included in the Skinner Ridge 2023 SWAMP. Wattles that are non-

functional have been removed. Rock apron has been installed at openings on pipe drain from culvert. The holes or openings on the pipe are there to decrease the amount of run off at the end of the pipe. The holes are to reduce the amount and force of water at the outlet of the pipe. The holes also allow for distribution of run off and reduces the amount of run off at the pipe outlet. In the late fall the 27-1 pit will be worked with a heavy harrow to distribute straw that has accumulated across the 27-1 pit and topsoil pile areas. This will increase water retention throughout the entire reclaimed area. Additionally, the reclaim area will be reseeded with additional supplements to encourage revegetation throughout the pad and topsoil pile areas.
