Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECOM is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

ENR intends to close the Redbud 44-7 pit Facility ID:426708 in response to INSP#695109908. Liner will be removed and soil sampling will identify if soil has been impacted.

PROPOSED SAMPLING PLAN**Proposed Soil Sampling**

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

ENR will conduct soil sampling at the area of greatest impact within the pit for full Table 915-1 analytes. Two sites, SS2 and SS3, within the pit will be analyzed for 915-1 Soil Suitability for Reclamation and Metals. Soil sampling will be expanded to include full 915-1 analytes if detected at SS1. One native sample will be collected and analyzed for Table 915-1 metals.

REMEDIAL ACTION PLAN

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Natural attenuation.

REMEDIAL ACTION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Soil samples will determine if source removal methods are necessary. If they are, natural attenuation will be used. If necessary, impacted soil will be removed and properly disposed of at the Trinidad Landfill, pending approval.
