CORRECTIVE ACTIONS:

1 CA# 198449

Corrective Action:

Date: 10/15/2024

Conduct reclamation in accordance with 1004 rules at the Location/Road including, but not limited to removal of utility equipment/culverts/gravel material, compaction alleviation, recontour/regrading and establish vegetation with total perennial, non-invasive uniform plant cover of at least 80% of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district.

Comply with Rule 1002.f and ensure erosion controls are implemented to stabilize the seeded soil. Comply with Rules 1004.e and 606.c: Oil and Gas Locations will be kept free of all Undesirable Plant Species. Ongoing stormwater and weed management required until Final Reclamation has passed.

Response: CA COMPLETED

Date of Completion: 09/11/2024

Operator
Comment:

The owner wants to keep all graveled roads. Weed spraying and reseedling was successfully completed in June 2024. However, due to unforeseen circumstances, including unusually dry conditions and lack of rainfall, weeds reemerged before a scheduled inspection. Given the approaching change in season, reapplying the spray before spring of 2025 would be inefficient. The land owner has requested that the gravel remain on site. The power poles seen on the edge of pad do not belong to pad and all signage has been removed.

ECMC Decision: **Not Approved**
