Juan,

Thank you for this notice.

I agree with you that we would prefer notice much sooner than a month later, preferably within 48 hours.

Has this site been cleaned up as of today?

Regards,

**Brandon B. Marette, CWB®**

Hi Brandon,

On August 23, 2024, KPK identified a spill along the Rasmussen flowline (Location ID: 478833) at approximately 40.110337, -105.024372 . The location is within a mapped High Priority Habitat - Bald Eagle Roost Site. The spill has been contained and cleanup operations are currently underway. I apologize for the delayed notification which was overlooked and affected our timely communication. Please let me know if you require any further information .

Thank you,  
Juan Reyes
