|---|--|---|
| <p>Previous FIR (doc #708201430) documented undesirable vegetation growing at the former well location and along the access road. Operator submitted FIRR (doc #403874580) stating that corrective actions have been completed and that undesirable vegetation was managed/mowed. During this inspection, Staff observed that undesirable vegetation appears to have been managed along the access road, well location and the former tank battery area. The three meter sheds (two Kerr McGee, one PDC), and associated piping, remain at the former tank battery area. Operator representative informed staff on a 10/02/2024 phone call that Oxy is actively working with the midstream company to remove the meter sheds.</p> | | |
| Corrective Action: | <p>Remove all surface equipment and perform reclamation in accordance with Rule 1004. The corrective action will remain until it is addressed in its entirety.</p> | Date _____ |
