General Comment:

ECMC staff; Kris Neidel inspected Iles Dome Pit Facility ID #s116587, 116589, and 119213 on 10/3/24. Weather was 70 degrees. The following was observed: Spilled fluid on the ground near the northwest corner of the cement sump, the fluid was tracked down the road, this road is used daily for ranch access. Below the culvert, off of the county road, oil was observed in the dry creek bed. At the pit, approximately 15% of the pit had fluid on the surface, the pit fluid level was lower than previously observed, oil in pit soil, evidence that some oily soil has been removed from the pit, area below excavated soil appeared as grey soil. No netting on pit. Corrective Actions; Immediately remove the spilled fluid at cement sump and maintain road. Removed observable oil on dry creek bed below Culvert. Submit a report of work completed on a Supplemental Form 27 (Remediation Number 28244), the last update was March 19, 2024 (doc #403480397), included final disposition haul tickets for soil and water. Per Rule 909.b.: Operator will immediately remove any accumulation of oil or condensate, including free product or hydrocarbon sheen, , "Operator anticipates the remaining cost for this project to be: \$250,000. Within 30-days of Staff approval of F27 Doc #403723687, Operator to provide a detailed task and cost breakdown for the \$250,000." Response to be provided on a Form 27. Any corrective action(s) from previous inspections that have not been addressed are still applicable See attached Photos.
