CORRECTIVE ACTIONS:

1 CA# 199526

Corrective Action: Submit an eForm 44 Flowline Report per Rule 1101.a. Date: 10/10/2024

Response: FACTUAL REVIEW REQUEST

Basis for Review: Requested documentation was submitted prior to the inspection

Operator Comment: We received two Inspections #713600524 (12/21/23) and #713600644 (1/23/24) issued by ECMC Field Inspector Ryan Costa indicating the off-location flowline for the Woolly Bugger 34-20 well had not been registered via Form 44. Operator followed through to fill out the Form 44, Doc #403680571 and submitted it on 3/25/24 amidst discussions with Steve Wheeler on 3/22/24. It was approved on 3/26/24, We are unsure why Inspector Ryan

Costa continues to cite the flowline registration as incomplete.

2 CA# 199527

Corrective Action: Comply with 1003 Interim reclamation Rules.

Date: _____

Response: FACTUAL REVIEW REQUEST

Basis for Review: Findings are inappropriately tied to multiple wells

Operator Comment: The area addressed by Inspector Ryan Costa has been previously addressed on the Apache 33B-20 inspections (713600522, 713600850, 713601052 & 713601510) to complete reclamation. The land owner has waived reclamation requirements and has asked for the location to remain "as is" for a potential home site once all oil activity is complete. The Operator is currently working with Ardor Environmental and McGowne Law Firm to seek a VARIANCE to WAIVE RECLAMATION on this site. The Operator has taken steps to remove weeds near the location throughout the entire year. Operator has also seeded and straw-crimped the addressed area but it has yet to establish vegetation (an on-going task on the desert soil, with most recent seeding on 10/08/24). SEE ATTACHED PHOTOS

OPERATOR COMMENT AND SUBMITTAL

Comment: Operator was cited for not having a Form 44 submitted on this well. Form 44, Doc #403680571 was approved 3/26/24. Operator was cited for not having established vegetation on the west side of tank battery. Operator reseeded/strawed the area but it has yet to establish vegetation.....continues to be an on-going task for the desert soil. The subject well is in the vicinity of the Apache 33B well that was P&A'd 11/2022. Operator is seeking a variance to waive reclamation and turn over the site "as is" to the landowner per his request.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
