- Building Unit – as defined in 100 Series Rules.

SUBSURFACE MINERAL SETBACKS

Required for change of Top and/or Base of Productive Zone. Enter 5280 for distance greater than 1 mile.

Is this Well within a unit?

If YES:

Enter the minimum distance from the Completed Zone of this Well to the Unit Boundary:

Enter the minimum distance from the Completed Zone of this Well to the Completed Zone of an offset Well within the same unit permitted or completed in the same formation:

If NO:

Enter the minimum distance from the Completed Zone of this Well to the Lease Line of the described lease:

Enter the minimum distance from the Completed Zone of this Well to the Completed Zone of an offset Well producing from the same lease and permitted or completed in the same formation:

#### COMMENTS:

On 04/17/2024 we obtained a bradenhead gas sample. The composition was 0 mol % ethane, 0 mol % hydrogen, 5 mol % methane, and 93 mol % nitrogen. This samples indicates Bradenhead gas to be thermogenic gas with somewhat similar composition as the production gas sample. Because the cement passes the well's producing zone, some residual methane is expected. We also obtained a production gas sample on 04/17/2024. This well was added to our Mitigation program on 03/18/2024. Chevron performed a fluid pull on 04/11/2024. During the fluid pull we collected 100 gallons of fluid from the bradenhead. On 10/03/2024 a Form 17 was completed with a starting pressure of 21 and an ending pressure of 0 psi. We request an extension to continue and perform fluid pulls to mitigate the bradenhead pressures. Chevron will perform another Form 17 test in 6 months and a follow up Form 4 will be submitted to the ECMC
