Subject: Arickaree Creek SWD#1 Spill

Good afternoon Ty,

We just spoke on the phone about the spill at the Arickaree Creek SWD#1 tank battery.

The site is located on CR 4B about 1/10 of a mile West of CR 35 and then south into.

The computer crashed causing the pump to quit and the tank ran over, the spill is contained in the containment and is being cleaned up as I type.

This email is just to inform you that we have had a spill.

Thanks,
Brad Smith
