General Comment:

This is a Final Reclamation Inspection at a plugged and abandoned multi-well location and the associated tank battery. The last well (001-10152) was plugged and abandoned 11/29/2023.

Only one well was drilled at the location, the other three well permits were abandoned on Form 4 Sundry notices and will be addressed with a separate field inspection report.

Comment:

<p>At the time of inspection there had not yet been any reclamation activities at the well location. Location pad and equipment (meter house, bollards, fencing) remained, the location has yet to be recontoured, graded or deep ripped. Surrounding the location were large populations of scotch thistle and common mullein that once final reclamation activities have begun will need to be managed. Reclamation rules require reclamation activities to be conducted within twelve months of plugging on non-cropland. Well was plugged 11/29/2023, therefore final reclamation must be completed by 11/29/2024.</p>		Date _____
