## Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

## OPERATOR COMMENT

Denied 10/24/2024 This form serves to comply with the Rule 913.e. reporting schedule. The review status of the previously proposed workplan (Doc. # 403862747) is "In Process" on Web Forms. The Operator completed the additional site investigation as outlined on Doc. # 403862747.

Elevated EC was observed in multiple characterization samples used to delineate the magnitude and extent of elevated EC but was not deemed attributable to native soil conditions by the ECMC. Per the COA provided on Doc. #402640641 the Operator submitted a detailed reclamation plan pursuant to Rule 915.b and is requesting an NFA designation be granted with elevated inorganics left in situ.

Supplemental Form 27s will be prepared and submitted on a quarterly schedule to provide updates and progress of the remediation until an NFA designation has been received.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

## COA Type

## Description

	This form is denied because the closure request is denied. The Operator shall establish soil suitability for reclamation parameters in background samples. The Operator shall more fully characterize the extent of electrical conductivity (EC) impacts on the site both vertically and horizontally. The Operator shall also resample those locations with previously documented soil suitability exceedances and analyze those samples for Table 915-1 Contaminants of Concern because this Remediation Project was not resolved prior to January 15, 2022.
