**General Comment:**

On 10/22/2024 Reclamation Specialist Corey McDonough conducted a Final Reclamation Inspection at Logos Operating's Bondad 33-10 6 Location in La Plata County, Colorado.

During the inspection the following compliance issues were observed

- Weedy Debris
- Access Road Reclamation

Refer to the "Final Reclamation" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Comment:

Corrective Action:	<p style="color: blue;">Location and access road do not comply with 1004 rules/standards. Portions of the location show establishment of desirable vegetation including but not limited to Sand Dropseed, Intermediate Wheatgrass and Indian Ricegrass, however majority of reclaimed area is dominated by weedy Kochia and Russian Thistle debris/vegetation that is interfering with the establishment of desirable plant species.</p> <p style="color: blue;">Additionally remains with remnant gravel, bare soils and erosion issues with evidence of sediment transport. Access road needs additional reclamation.</p> <p style="color: red;">Comply with Rule 1004. Reseed access road using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p> <p style="color: red;">Remove weedy debris to promote establishment of desirable vegetation on the reclaimed well pad.</p>	Date <b>11/07/2024</b>
