**General Comment:**

This is a follow-up Interim Reclamation and Stormwater Inspection for Location ID (312291) and to the previous FIR (doc #708201668) conducted on 09/30/2024.

Refer to Environmental FIR (doc #709100441) conducted on 10/29/2024 for additional information.

This location has an associated AOC with Order NO. (1V-870).

Refer to the photo documentation of the observed compliance issues attached to this report. Any corrective action(s) and corrective action due dates from previous inspections that have not been addressed are still applicable.

1002a. FENCING \_\_\_\_\_

Comment \_\_\_\_\_

Corrective Action \_\_\_\_\_

Date \_\_\_\_\_

1002b. SOIL REMOVAL AND \_\_\_\_\_ Fail \_\_\_\_\_

Comment \_\_\_\_\_

Previous Comment from FIR (doc #708201015) "Staff observed that impacted material had been stockpiled and stored on top of undisturbed vegetation and soil, south of the previously identified salt kill areas. There was no evidence to suggest that topsoil had been separated and stored prior to stockpiling of the impacted materials, nor was there any indication (signage, etc.) of stored topsoil elsewhere on the location".

It does not appear that the corrective action has been performed at the time of this inspection. Refer to attached inspection photos.

Corrective Action \_\_\_\_\_

Comply with Rule 1002.b.

Date \_\_\_\_\_

1002c. PROTECTION OF SOILS \_\_\_\_\_ Fail \_\_\_\_\_

Comment \_\_\_\_\_

Previous Comment from FIR (doc #708201015) "Staff observed a new disturbance/excavation south of and west of pit(#256304) and throughout the previously identified salt kill areas, totalling approx. 0.75 acre in size with an estimated stockpile volume of 2500CY. Stockpiled soil appears to have been placed directly on top of undisturbed soil/vegetation (e.g. soils not impacted by salt kill) and no evidence of an impermeable liner was observed. Additionally, stockpiled soils do not appear to be properly stabilized as material has been left unconsolidated. Additional stabilization BMPs are required to prevent wind and water erosion degradation on the stockpiled soils and at the excavation sites".

Corrective Action \_\_\_\_\_

It does not appear that the corrective action has been performed at the time of this inspection. (Original CA Date: 04/09/2024).

Comply with Rule 1002.c.

Date \_\_\_\_\_

1002E. SURFACE DISTURBANCE MINIMIZATION \_\_\_\_\_ Fail \_\_\_\_\_

Comment \_\_\_\_\_

Previous Comment from FIR (doc #708201015) "Staff observed new disturbances resulting from excavation of the salt kill area (approx. 0.75 acres) and stockpiled soils (approx. 2500CY) placed directly on top of undisturbed reference areas. Vehicle traffic also appears to be occurring outside of established access/lease roads. These disturbances have not been approved under ECMC rules and regulations".

It does not appear that the corrective action has been performed at the time of this inspection. Original corrective action date remains applicable. Refer to attached inspection photos.

Corrective Action \_\_\_\_\_

Comply with Rule 1002.e. (Original CA date of 10/16/2023 when the location was first observed out of compliance).

Comply with Rule 304.a to submit a Form 2A (Oil and Gas Location Assessment) to ECMC to increase the existing Oil and Gas Location to include the new land disturbances (approx. 0.75 acres in size). The location will remain out of compliance until the corrective action has been resolved. Refer to Environmental Inspection (doc #709100243) for additional information.

1003 f. Weeds Noxious weeds? \_\_\_\_\_

Comment \_\_\_\_\_

This location does not comply with Rule 1003. It does not appear any additional reclamation activities have been performed since the previous inspection(s) and the Operator has not submitted any FIRR in response to this compliance issue. Site degradation remains evident with open remediation excavations, improperly stabilized stockpiles and stormwater erosion issues. Additional reclamation activities are required. Refer to attached inspection photos.

Corrective Action \_\_\_\_\_

Comply with Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards.

**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment:	This location does not comply with Rule 1002.f. It does not appear that any additional stormwater control measures/BMPs have been implemented or that any existing erosion degradation has been stabilized and/or repaired. Impacted material stockpiles remain unstabilized as they have been left unconsolidated. There are no apparent perimeter stormwater control measures around the stockpiled materials, which show evidence of rilling and sediment discharge outside of the fenced portions. Refer to attached inspection photos for additional information.				
Corrective Action:	Comply with Rule 1002.f.(2) to install BMPs in accordance with good engineering practices and repair erosion degradation.
