General Comment:

ECMC staff Kris Neidel inspected the Elk Springs #4 wellpad and the release point for REM # 31024. Weather was 50 degrees. The following was observed; oil trash and filter socks and ground inside of the pumphouse adjacent to the well. The spill/release point for Remediation #31024, below the #4 wellpad is observable as black stained soil. Corrective Actions: Remediation Project 31024 is delinquent by all metrics; reporting and remediation. By rule, quarterly reporting is required. A Form 27 with a robust plan to delineate any impact shall be submitted (Along the entire spill path). Root cause analysis shall be included. The piping that failed/allowed water to be discharged to this point shall be removed and investigated. See Photos attached.
