Operator Comments:

KMOG is requesting approval to install a small, permanent micro instrument air skid mounted in a cabinet measuring approximately 3'x5' on the Kunzman Federal 35N-8HZ northernmost well pad (location 432232) to reduce the environmental impact. This skid will supply instrument air, instead of natural gas, to operate the pneumatically controlled wellhead equipment for the Kunzman Federal 13C-8HZ, 13N-8HZ, 35N-8HZ and Kunzman 14N-8HZ wells.

This request is related to sundry 404006390, which requests the installation of a permanent 15hp instrument air compressor skid at the Kunzman Federal Tank Battery 35N-8HZ (location 432015). The instrument air skid will serve the facility equipment for the following wells on the northernmost pad: Kunzman Federal 13C-8HZ, 13N-8HZ, 35N-8HZ and Kunzman 14N-8HZ, and the following wells on the southernmost pad: Kunzman Federal 30N-5HZR, 30N-5HZ and Kunzman 4N-5HZ, 29N-5HZ and 3N-5HZ. These are two separate well pads utilizing the same facility ID, Kunzman Fed 35N-8HZ (location 432232) located southwest of the facility.

No additional flowlines will be trenched to the well pads, due to the 15hp compressor being set at the facility, this micro air skid being set at the northernmost well pad and KMOG utilizing an existing bradenhead abatement line running to the southernmost well pad to run the pneumatically controlled wellhead equipment.

This equipment is not expected to result in additional traffic, light, or noise impacts to surrounding stakeholders.

Please see attached plot plan for details.

KMOG plans to install the new equipment on January 1, 2025.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
