## Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

**OPERATOR COMMENT**

This Supplemental Form 27 serves as a timeline update. SUMMIT DJ-S LLC was unable to conduct planned drilling at this site for delineation purposes on 8/14/2024 due to inclement weather and road conditions accessing the site. Summit is currently working on contracting a track-mounted hollow stem auger rig capable of achieving the 15+ foot depths and accessing the site, to complete the delineation and background sampling plan from the approved Supplemental Form 27 (Document # 403782685). Drilling is planned to be conducted in the Spring of 2025.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
