Environmental

Spill/Remediation:

Comment:

ECMC Environmental Inspection of Remediation Project 34906 for well P&A and flowline abandonment, and followup to reported historical Release at WAAG 9 well. Operator reported historical Release documenting TPH impacts in the well excavation. All well excavations onsite are currently open. Flowlines appear to remain in place.

Operator has submitted soil sample analytical results for 5 of 7 wells: Waag 8,9,10,11,12. P&A wells Waag 6 and Waag 7 have apparently not been assessed. Flowlines have not been assessed.

Operator submitted a Supplemental Form 27, Document #404058882 requesting to further extend remediation excavation and assessment schedule. However no justification has been provided for the delay in the excavation at the Waag Middle pad or the Waag North pad (Remediation 34900). Form 27 Document #404058882 was denied.

Corrective Action:

Operator shall commence execution of the approved Form 27 Site Investigation and Remediation Workplan as approved on Document #s 403730354, 403833066 and 403955599.
