Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On January 8, 2025, a release of unknown volume was discovered at the Herman UPRR 31-31 1 Flowline, due to fluid daylighting from the subsurface during flowline flushing activities. Cleanup and site assessment activities are currently ongoing and will be summarized in a forthcoming Supplemental Form 19 Spill/Release Report. A topographic Site Location Map showing the geographic setting of the release is provided as Figure 1. The State Notification email is provided as Attachment B.
