Operator Comments:

KMOG is requesting approval to install a permanent 105-gallon liquid nitrogen tank at the Cannon Tank Battery 1N-11HZ (location 425154). This installation will reduce emissions and the environmental impact of the facility by providing nitrogen gas, instead of natural gas, to operate pneumatically controlled valves.

The nitrogen tank installed at this location and will provide instrument air to operate the pneumatically controlled facility equipment for the following wells: Cannon Land 16-11, Cannon 1N-11HZ, and 2C-11HZ (location 332128).

Additionally, KMOG is requesting approval to install a small, 70-gallon permanent liquid nitrogen tank on the Cannon 1N-11HZ well pad (location 332128). The nitrogen tank will provide instrument air, replacing natural gas, to operate the pneumatically controlled wellhead equipment for the following wells: Cannon Land 16-11, Cannon 1N-11HZ, and 2C-11HZ (location 332128)

There will be a slight increase in traffic, as a nitrogen truck will refill the tanks approximately once every 30-60 days.

This equipment is not expected to result in additional light, or noise impacts to surrounding stakeholders.

Please see attached plot plan for details.

KMOG plans to install the new equipment on February 26, 2025.
