

**Wiepking Fullerton Energy LLC  
Ma State TB  
Spill Event Remediation Plan of Action  
03-15-2025**

**Location Details:**

**Operator Name:** Wiepking Fullerton Energy LLC

**Operator Number:** 96340

**Location Name:** Ma State Tank Battery

**Lat/Long:** 39.162180, -103.619250

**Remediation Project #:** 33007

**Summary:**

Location is currently on quarterly reporting. Operator has been monitoring location all winter in preparation for soil sampling and excavation

**2025 Q1 Update:**

The WFE operations team visited the location bi-monthly through out the winter to evaluate the location access for updated soil sampling and remediation.

On March 3/3/2025, the operator sent out an engineering and environmental team to evaluate the location. Although snow melted has resided at the time, the location was still to wet and soft to bring in excavation equipment to make an updated dig, without ruining the rest of the current farmland.

Operator will continue to monitor the location into spring. Once the ground has dried from winter mud conditions, an updated excavation event will occur, and soil samples will be taken. 2025 Q2 reports will show the sample locations and results (if available) as well as the location of excavated dirt area.
