Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27.

This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR INFORMATION

Name of Operator: <u>POC-I LLC</u>	Operator No: <u>10386</u>	Phone Numbers
Address: <u>P.O. BOX 51208</u>		
City: <u>CASPER</u>	State: <u>WY</u>	Zip: <u>82605</u>
Contact Person: <u>Rebecca Podio</u>	Email: <u>rpodio@gmail.com</u>	Phone: <u>(307) 7466468</u>

PROJECT, PURPOSE & SITE INFORMATION

PROJECT INFORMATION

Remediation Project #: 28244 Initial Form 27 Document #: 403272607

PURPOSE INFORMATION

- Rule 913.c.(1): Pit or Cuttings Trench closure.
- Rule 913.c.(2): Buried or partially buried vessel closure, which will be by removal.
- Rule 913.c.(3): Remediation of Spill and Releases pursuant to Rule 912.
- Rule 913.c.(4): Land treatment of Oily Waste pursuant to Rule 905.e.
- Rule 913.c.(5): Closure of Centralized E&P Waste Management Facilities pursuant to Rule 907.h.
- Rule 913.c.(6): Remediation of impacted Groundwater pursuant to Rule 915.e.(3).D, and the contaminant concentrations in Table 915-1.
- Rule 913.c.(7): Investigation and remediation of natural gas in soil or Groundwater.
- Rule 913.c.(8): When requested by the Director due to any potential risk to soil, Groundwater, or surface water.
- Rule 913.c.(9): Decommissioning of Oil and Gas Facilities.
- Rule 913.g: Changes of Operator.
- Rule 915.b: Request to leave elevated inorganics in situ.
- Other: _____

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	To be determined	Visual inspection and laboratory analysis
Yes	SURFACE WATER	To be determined	Visual inspection and laboratory analysis

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Oil was initially discharged from the pit's discharge outfall (Facility ID 116589). Booms were placed, and areas with a sheen were recovered with a vacuum truck. Representatives of POC have walked the spill pathway to identify areas of impact. No impacted vegetation was observed. Impacted soils and water will be remediated to below-appropriate standards.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Pre-sampling will occur in both the large pit and the two smaller pits to identify the extent of the contamination. Sampling will also determine when both areas have met the standards required by ECMC and other regulators.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Ongoing groundwater monitoring at the location is to be completed under Remediation Project #8398

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan (summary):

SITE INVESTIGATION REPORT

SAMPLE SUMMARY

Soil

NA / ND

Number of soil samples collected 0

-- Highest concentration of TPH (mg/kg)

Number of soil samples exceeding 915-1

-- Highest concentration of SAR

Was the areal and vertical extent of soil contamination delineated? No _____

BTEX > 915-1 No _____

Approximate areal extent (square feet) _____

Vertical Extent > 915-1 (in feet) _____

Groundwater

Number of groundwater samples collected 0 _____

Highest concentration of Benzene (µg/l) _____

Was extent of groundwater contaminated delineated? No _____

Highest concentration of Toluene (µg/l) _____

Depth to groundwater (below ground surface, in feet) _____

Highest concentration of Ethylbenzene (µg/l) _____

Number of groundwater monitoring wells installed _____

Highest concentration of Xylene (µg/l) _____

Number of groundwater samples exceeding 915-1 _____

Highest concentration of Methane (mg/l) _____

Surface Water

0 Number of surface water samples collected

0 Number of surface water samples exceeding 915-1

If surface water is impacted, other agency notification may be required.

OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) _____

Volume of liquid waste (barrels) _____

Is further site investigation required?

Site investigation will continue throughout the remediation process. The first further site investigation will occur throughout the pre-sampling portion of this plan.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? Yes _____

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

This plan is specifically for the remediation of the pits.

Division Strategy: Divide the pit into 6-8 quadrants, allowing for focused and efficient cleanup efforts. Physical barriers will be erected to prevent cross-contamination. The layout of the divisions will be determined by the pit's physical features and the information gained from the pre-sampling work.

Operational Approach: Heavy machinery will be utilized for excavation and material handling, significantly minimizing worker direct exposure to contaminants. All operations will adhere to strict safety protocols, with personnel equipped with necessary personal protective equipment (PPE) and receiving task-specific training.

REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Executive Summary

This document presents a strategic plan for remediation of hydrocarbon contamination at the Large Discharge Pit (Facility ID 116587) at the Ilse Dome Tank Battery, emphasizing adherence to environmental standards, regulatory compliance, and safety and efficiency. It outlines a comprehensive approach to address contaminants, primarily focusing on hydrocarbons due to black oil carryover, with a commitment to environmental compliance and returning the Ilse Dome Field to production.

Project Overview

The objective is to remediate hydrocarbon contamination, facilitating the safe and productive reuse of the Ilse Dome Field. The plan spans from May 1, 2024, to July 1, 2024, within a timeline that accommodates environmental and operational considerations to minimize adverse impacts.

Contaminant Focus and Remediation Strategy

- Primary Contaminants: Hydrocarbons, specifically Total Petroleum Hydrocarbons (TPH), identified from black oil in production water.
- Sampling and Analysis: Pre-remediation will involve 20 - 80 sample holes along the bottom and sides of the pit to determine the contamination extent, focusing initially on visual indicators of contamination. Samples will also be sent to a lab during this stage to determine the extent and depth of the contamination. This sampling will lead to an analysis that will help with better planning and timing estimates of future work on the pit.
- Regulatory Compliance: All activities will conform to ECMC rules and regulations, timing stipulations from CPW, and any other applicable regulatory rules while ensuring environmental safety and compliance.

Soil Remediation Summary

In Situ

Ex Situ

_____ Bioremediation (or enhanced bioremediation)

Yes _____ Excavate and offsite disposal

_____ Chemical oxidation

If Yes: Estimated Volume (Cubic Yards) _____ 1000

_____ Air sparge / Soil vapor extraction

Name of Licensed Disposal Facility or ECMC Facility ID # _____

_____ Natural Attenuation

_____ Excavate and onsite remediation

_____ Other _____

_____ Land Treatment

_____ Bioremediation (or enhanced bioremediation)

_____ Chemical oxidation

_____ Other _____

Groundwater Remediation Summary

_____ Bioremediation (or enhanced bioremediation)

_____ Chemical oxidation

_____ Air sparge / Soil vapor extraction

_____ Natural Attenuation

_____ Other _____

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

REMEDIATION PROGRESS UPDATE

PERIODIC REPORTING

Approved Reporting Schedule:

Quarterly Semi-Annually Annually Other

Request Alternative Reporting Schedule:

Semi-Annually Annually Other

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

Report Type: Groundwater Monitoring Land Treatment Progress Report O&M Report

Other Soil Results

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Operator anticipates the remaining cost for this project to be: \$ 250000

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? No

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Volume of E&P Waste (solid) in cubic yards

E&P waste (solid) description

ECMC Disposal Facility ID #, if applicable:

Non-ECMC Disposal Facility:

Volume of E&P Waste (liquid) in barrels

E&P waste (liquid) description

ECMC Disposal Facility ID #, if applicable:

Non-ECMC Disposal Facility:

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

Compliant with Rule 913.h.(1).

Compliant with Rule 913.h.(2).

Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards?

Does the previous reply indicate consideration of background concentrations?

Does Groundwater meet Table 915-1 standards?

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The site will be reclaimed in accordance with COGCC 1000 Series Reclamation Rules with an approved Colorado Parks and Wildlife seed mix after completion of remediation.

Is the described reclamation complete? _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim Final

Did the Surface Owner provide the seed mix? _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? _____

SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. _____

Proposed date of completion of Reclamation. _____

IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

PRIOR DATES

Date of Surface Owner notification/consultation, if required. _____

Actual Spill or Release date, or date of discovery. 06/28/2022

SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 06/28/2022

Proposed site investigation commencement. 03/31/2023

Proposed completion of site investigation. 07/28/2023

REMEDIAL ACTION DATES

Proposed start date of Remediation. 03/31/2023

Proposed date of completion of Remediation. 08/01/2024

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

OPERATOR COMMENT

As of Q1 2025, remediation work in the Ilse Dome Field was paused due to a change in the dynamic of the ongoing disputes involving the surface landowner. Despite significant progress in excavation and contaminated material removal in late 2024, access to the site was impacted by challenges with the surface landowner.

On March 6, 2025, a mediation session was held with all relevant parties, including the surface landowner, to resolve outstanding disputes. Mediation was not completed on that date. Over the next two weeks, legal counsel for POC-I LLC continued working closely with the mediator to resolve this dispute. As of March 31, 2025, the efforts to settle the pending litigation through mediation continue.

During this pause in work, POC-I has continued covering the costs of keeping essential equipment on standby in the field, ensuring that remediation can resume as soon as access to the site can be secured through the landowner or their counsel and the litigation is resolved.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

Remediation Project Number: 28244

COA Type

Description

	The implementation schedule is not current. Within 2-weeks after approval of this Form 27 Operator will provide the COGCC with a comprehensive schedule detailing assessment, remediation, and reclamation for Remediation Project #28244.
	Within 2-weeks after approval of this Form 27, Operator shall provide a comprehensive report (Supplemental Form 27) on activities performed to date, including laboratory reports, a summary of the analytical results, site map of where samples were collected and depth of samples.
	Within 2-weeks after approval of this Form 27 Operator shall update the financial assurance.
	Operator is out of compliance and all previous COAs not addressed are still applicable. See Doc# 404011527, Doc #404076977, DOC#404077049, and Doc #403272607, Doc# 403723687.
