Comment:

<p>The overall status for the Reclamation of the Location is "in process".</p> <p>Location appears to be progressing towards ECMCM 1004 uniform, desirable perennial vegetative requirements.</p> <p>Areas on the north end of the Location, and along the access road likely requires more time, however, additional seeding efforts may be necessary.</p> <p>Continue to monitor and manage the Location for weeds and stormwater until Location receives a passing final inspection. Conduct work as necessary to ensure site continued to progress towards 1004 standards.</p>
