## Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Please see Form 27 documents 403615029 and 403682132 for details of all investigation and remediation completed prior to the third quarter of 2024.

On August 30, 2024, Caerus resumed delineation activities. Using a hydro-vacuum truck, six potholes were advanced to depths ranging from 3.0 to 3.5 feet below ground surface (bgs) and one soil sample was collected at each terminus. Soil samples were characterized using visual and olfactory observations and field-screened for volatile organic compounds using a photoionization detector (PID). All samples were submitted for analysis of the approved reduced analyte list of total petroleum hydrocarbons (TPH) only.

See attached Report of Work Completed (ROWC) for additional details.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Caerus is proposing additional remediation via excavation and confirmation soil sampling. An appropriate number of samples will be collected to confirm successful removal of identified impacts. All samples will be submitted for the reduced analyte list of TPH only approved via ECMC Document 403615029.

#### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):
