**COMMENTS:**

TEP Rocky Mountain LLC (TEP) respectfully reports the results of recent diagnostic testing on the Williams GM 424-28. The Form 17 reporting the results of the recent bradenhead test is included in the "Related Forms" section. The resulting diagnostic testing indicated a potential leak in the production casing. TEP is reviewing the economics of repairing the production casing or to commence with plug and abandonment operations. Pending the completion of the review, TEP will submit the proper Forms to request EPMC approval of the proposed remedial work or the plug and abandonment operations.
