Environmental**Spill/Remediation:**

Comment: This is an Environmental Inspection for Remediation Project # 37633.

On 6/6/2025 ECMC Staff witnessed a routine sampling event conducted by Incremental Oil and Gas, (Incremental), at the Decommissioned Rainbow 23-20 well location and former Tank Battery. The purpose for the sampling event was to delineate Soil Suitability for Reclamation exceedances observed in analytical data provided in Form 27-s Doc # 404117701. Incremental collected 12 samples at 2 to 4 feet in depth, using a mini-excavator to access soils at depth; consistent with a Condition of Approval on Incremental's supplemental Form 27, all samples will be analyzed for full Table 915-1 parameters.

ECMC Staff collaborated with Incremental's consultant to split three of the field samples. Please see below information for the three soil samples split with Incremental. ECMC is running the split samples for full Table 915-1 parameters.

ECMC Sample ID TS-01 @ 2.5'. Area of the former tank battery. Impacted soils observed at Latitude 38.378705: Longitude -105.138024. At the time of sample collection, dark soils with a heavy hydrocarbon odor present, PID reading 480 PPM. Awaiting analytical data to be processed.

ECMC Sample ID SP-01 @ 3'. Area of the former separator. Impacted soils observed at Latitude 38.378922: Longitude -105.138120. At the time of sample collection, dark soils with a slight hydrocarbon odor present, PID reading 8.9 PPM. Awaiting analytical data to be processed.

During the sampling event, ECMC also requested additional investigation in a low lying area north of former wellhead, where historical aerial photos may have indicated the presence of a pit.

ECMC Sample ID Pit-01 @ 3'. Latitude 38.3790833: Longitude -105.1378056. At the time of sample collection, no visual impacts or hydrocarbon odors were observed. Awaiting analytical data to be processed.

Incremental representatives collected additional soil samples at the former well location. Additional Soil Analytical Data will be provided in a forthcoming Supplemental Form 27 for Remediation Project # 37633.

Corrective Action: The Operator shall continue quarterly reporting in accordance with Rule 913.e.
