ECMC Field Inspection Report Summary

This is an environmental inspection to determine progress on Spill ID 488679 and Remediation Project # 34664. Any corrective actions from previous inspections, NOAVs and/or conditions of approval from previous forms that have not been fully addressed are still applicable. There were no operator or contract environmental personnel on location at the time of this field inspection. Photos attached to document site conditions.

Spill Name: Lowe 1B SWD Well

Spill ID: 488679

Remediation Project #: 34664

Wellhead API #: 05-063-06186

Reported Date of Discovery: 05/13/2024

Date of Inspection: 05/30/2025

Weather: Sunny, 77°F

Current site status:

- An excavation remains open surrounding the former wellhead. The wellhead has been cut and capped.
- A segment of flowline was visible within the open excavation; valves remain attached and a bull plug has been installed.
- A segment of white plastic pipe was visible within the excavation; the pipe is uncapped.
- The well casing and a segment of white plastic pipe were visible adjacent to the wellhead excavation.
- The base of the excavation sidewalls appeared to have partially eroded.
- Weeds have grown within the excavations.
- Stockpiled soil utilized as a berm surrounded the open excavation. No fencing was visible.
- An unmarked soil stockpile and a small excavation were visible southeast of the former wellhead. No stormwater BMPs or liners were visible.
- Vegetation appears depressed in an area east of the former wellhead.

See attached corrective actions.

Type of Spill: _____

Estimated Spill Volume: _____

Comment: Remediation Project # 34664 was created for the plugging and abandonment of the LOWE 1-B wellhead and decommissioning of the associated flowline. An excavation remains open surrounding the former wellhead. The wellhead has been cut and capped. The base of the excavation sidewalls appeared to have partially eroded. Stockpiled soil utilized as a berm surrounded the open excavation. A small excavation was visible southeast of the former wellhead. Vegetation appears depressed in an area east of the former wellhead. Quarterly reporting is required under Remediation Project # 34664; the last Form 27 for this project was submitted 03/24/2025 (Document Number 404137777) and was denied by ECMC on 04/21/2025. Pursuant to Rule 912.b.(6) Operator was required to submit a Form 19 Supplemental Report for the associated spill within 90 days of the spill date requesting closure. The Form 19 — Supplemental Report for closure was due by 08/11/2024.

Corrective Action: **Operator shall submit delinquent form(s) for this project.**
