Comment: This location does not meet final reclamation standards. Bare gravel remains on the tank battery location and the tank battery does not appear to have been reclaimed. List B noxious weed scotch thistle is present on the former tank battery location. Bare soil is present around the wellbore areas and vegetation around the wellbore areas is primarily undesirable weed kochia and list C noxious weed cheatgrass. See attached photos.

Corrective Action:	Conduct reclamation on location according to Rule 1004. Remove gravel. Decompact soil to a depth of 18 inches. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.	Date _____
