Operator Comments:

KMOG is requesting approval to install a permanent 15hp instrument air skid at the Palyo 35N-W11HZ (location 428629). This installation will reduce emissions and the environmental impact of the facility by providing instrument air, instead of natural gas, to operate pneumatically controlled valves.

The instrument air skid installed at this location will provide instrument air to operate the facility equipment for the following wells: Palyo 13C-11HZ, 13N-11HZ, 14N-11HZ, 35N-E11HZ, and 35N-W11HZ (location 428629).

Additionally, KMOG is requesting approval to install small, permanent micro instrument air skids, housed in a cabinet measuring approximately 3'x5' on the Palyo 35N-W11HZ well pad (location 428629). These air skids will provide instrument air, replacing natural gas, to operate the pneumatically controlled wellhead equipment for the following wells: Palyo 13C-11HZ, 13N-11HZ, 14N-11HZ, 35N-E11HZ, and 35N-W11HZ

This equipment is not expected to result in additional traffic, light, or noise impacts to surrounding stakeholders.

Please see attachments for details.

KMOG plans to install the new equipment on July 31, 2025.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
