Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	TBD	Sampling

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Less than a bbl of oil released out the flare due to an upset condition. The release left the pad and caused a small fire approximately 10ftx10ft. The fire was immediately extinguished and no equipment or personnel were harmed. Clean up has commenced

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

The area of impact will be mapped and investigated to determine if impacts remain in place. This release was initially mistaken for the wellhead release which was closed out. Remediation to remove misted impacts took place, however, soil samples were never collected. Soil Samples will be collected in accordance with the 915 guidance. Based on DWR data depth to groundwater in at this location is 114' bgs. Due to the depth of groundwater residential soil screening limits will be utilized as the default limits.

#### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Investigation on this release will continue until it is determined all impacts have been removed.
