Good afternoon Andrew,

Please find a list of workover-related BMPs attached for your review. Mike Grooms is the DWM associated with this area — I have copied both him and Brandon on this email.

These consultations are for Aristocrat/Federal wells located near Milton Reservoir (same area as other recent consultation, but this is for P&A work). Operations are currently scheduled *outside* the applicable HPH seasons. We are hoping to submit the necessary paperwork ASAP, so if it's possible to respond by Monday 7/7, that would be much appreciated.

Please let me know if you have any questions.

Thank you for your time!

If operations cannot be completed outside the nesting season*, the operator will conduct a follow-up consultation with CPW. If operations cannot be completed outside the roost season, at least two non-consecutive roost surveys (one AM and one PM), separated by approx. one week, will be conducted: if no roosting is observed, work will proceed as normal; if roosting is observed within 1/2 mile, operations will be limited to two hours post-sunrise to two hours pre-sunset.	*This nest (northern pair) is no longer occupied with nestlings in the 2025 season (confirmed fledge in June), so the Operator would prefer to begin work in late July 2025 if necessary paperwork is approved in a timely manner.  Ongoing non-O&G disturbance also active in area.
